

# 2nd OPTICS Workshop

## From Hazard Management to Operational Resilience

Toulouse, 28/29 April 2015

The workshop is focussed on Air Vehicle Operations and Traffic Management.

Topics to be addressed:

- Crisis management and crew decision making
- Advanced data analysis and proactive identification of hazards
- Vehicle health management systems
- Increased safety of flight in adverse environmental conditions and better protection of aircraft and engine to icing
- Increased autonomy and UAS safety

### **Keynote speakers**

- Airbus: "Manufacturers perspective on future safety research"
- FAA/ASIAS: "Data sharing and data analysis"
- NASA: "Increased autonomy and UAS safety"
- EASA: "Safety Intelligence"
